About Us

GrapeCity is a technology company focused on **software development** and providing solutions for developers and businesses.

GrapeCity provides various tools and solutions for **application development**, **data visualization**, and **business intelligence**.

The company's products are used by **developers**, **businesses**, and **organizations** in various industries to build, manage, and analyze data-driven applications and systems.

GrapeCity's product line provides developers, designers, and architects with the ultimate collection of award-winning **JavaScript and .NET grids**, UI, reporting, spreadsheets, document APIs, and mobile controls.

MISSION

GrapeCity's motto is to empower developers to create **innovative solutions** that drive business success and strives to achieve this mission by providing **top-notch tools** and solutions that are easy to use and **integrate seamlessly** with existing systems.

VALUES

Customer Focus: GrapeCity is committed to providing **excellent customer service**. The company works closely with customers to **understand their needs and tailor solutions** to meet their requirements.

Quality: GrapeCity is committed to delivering **high-quality products** and solutions that **exceed industry standards**.

Integrity: GrapeCity is committed to conducting its business with **honesty, transparency**, and adhering to the **highest ethical standards**.

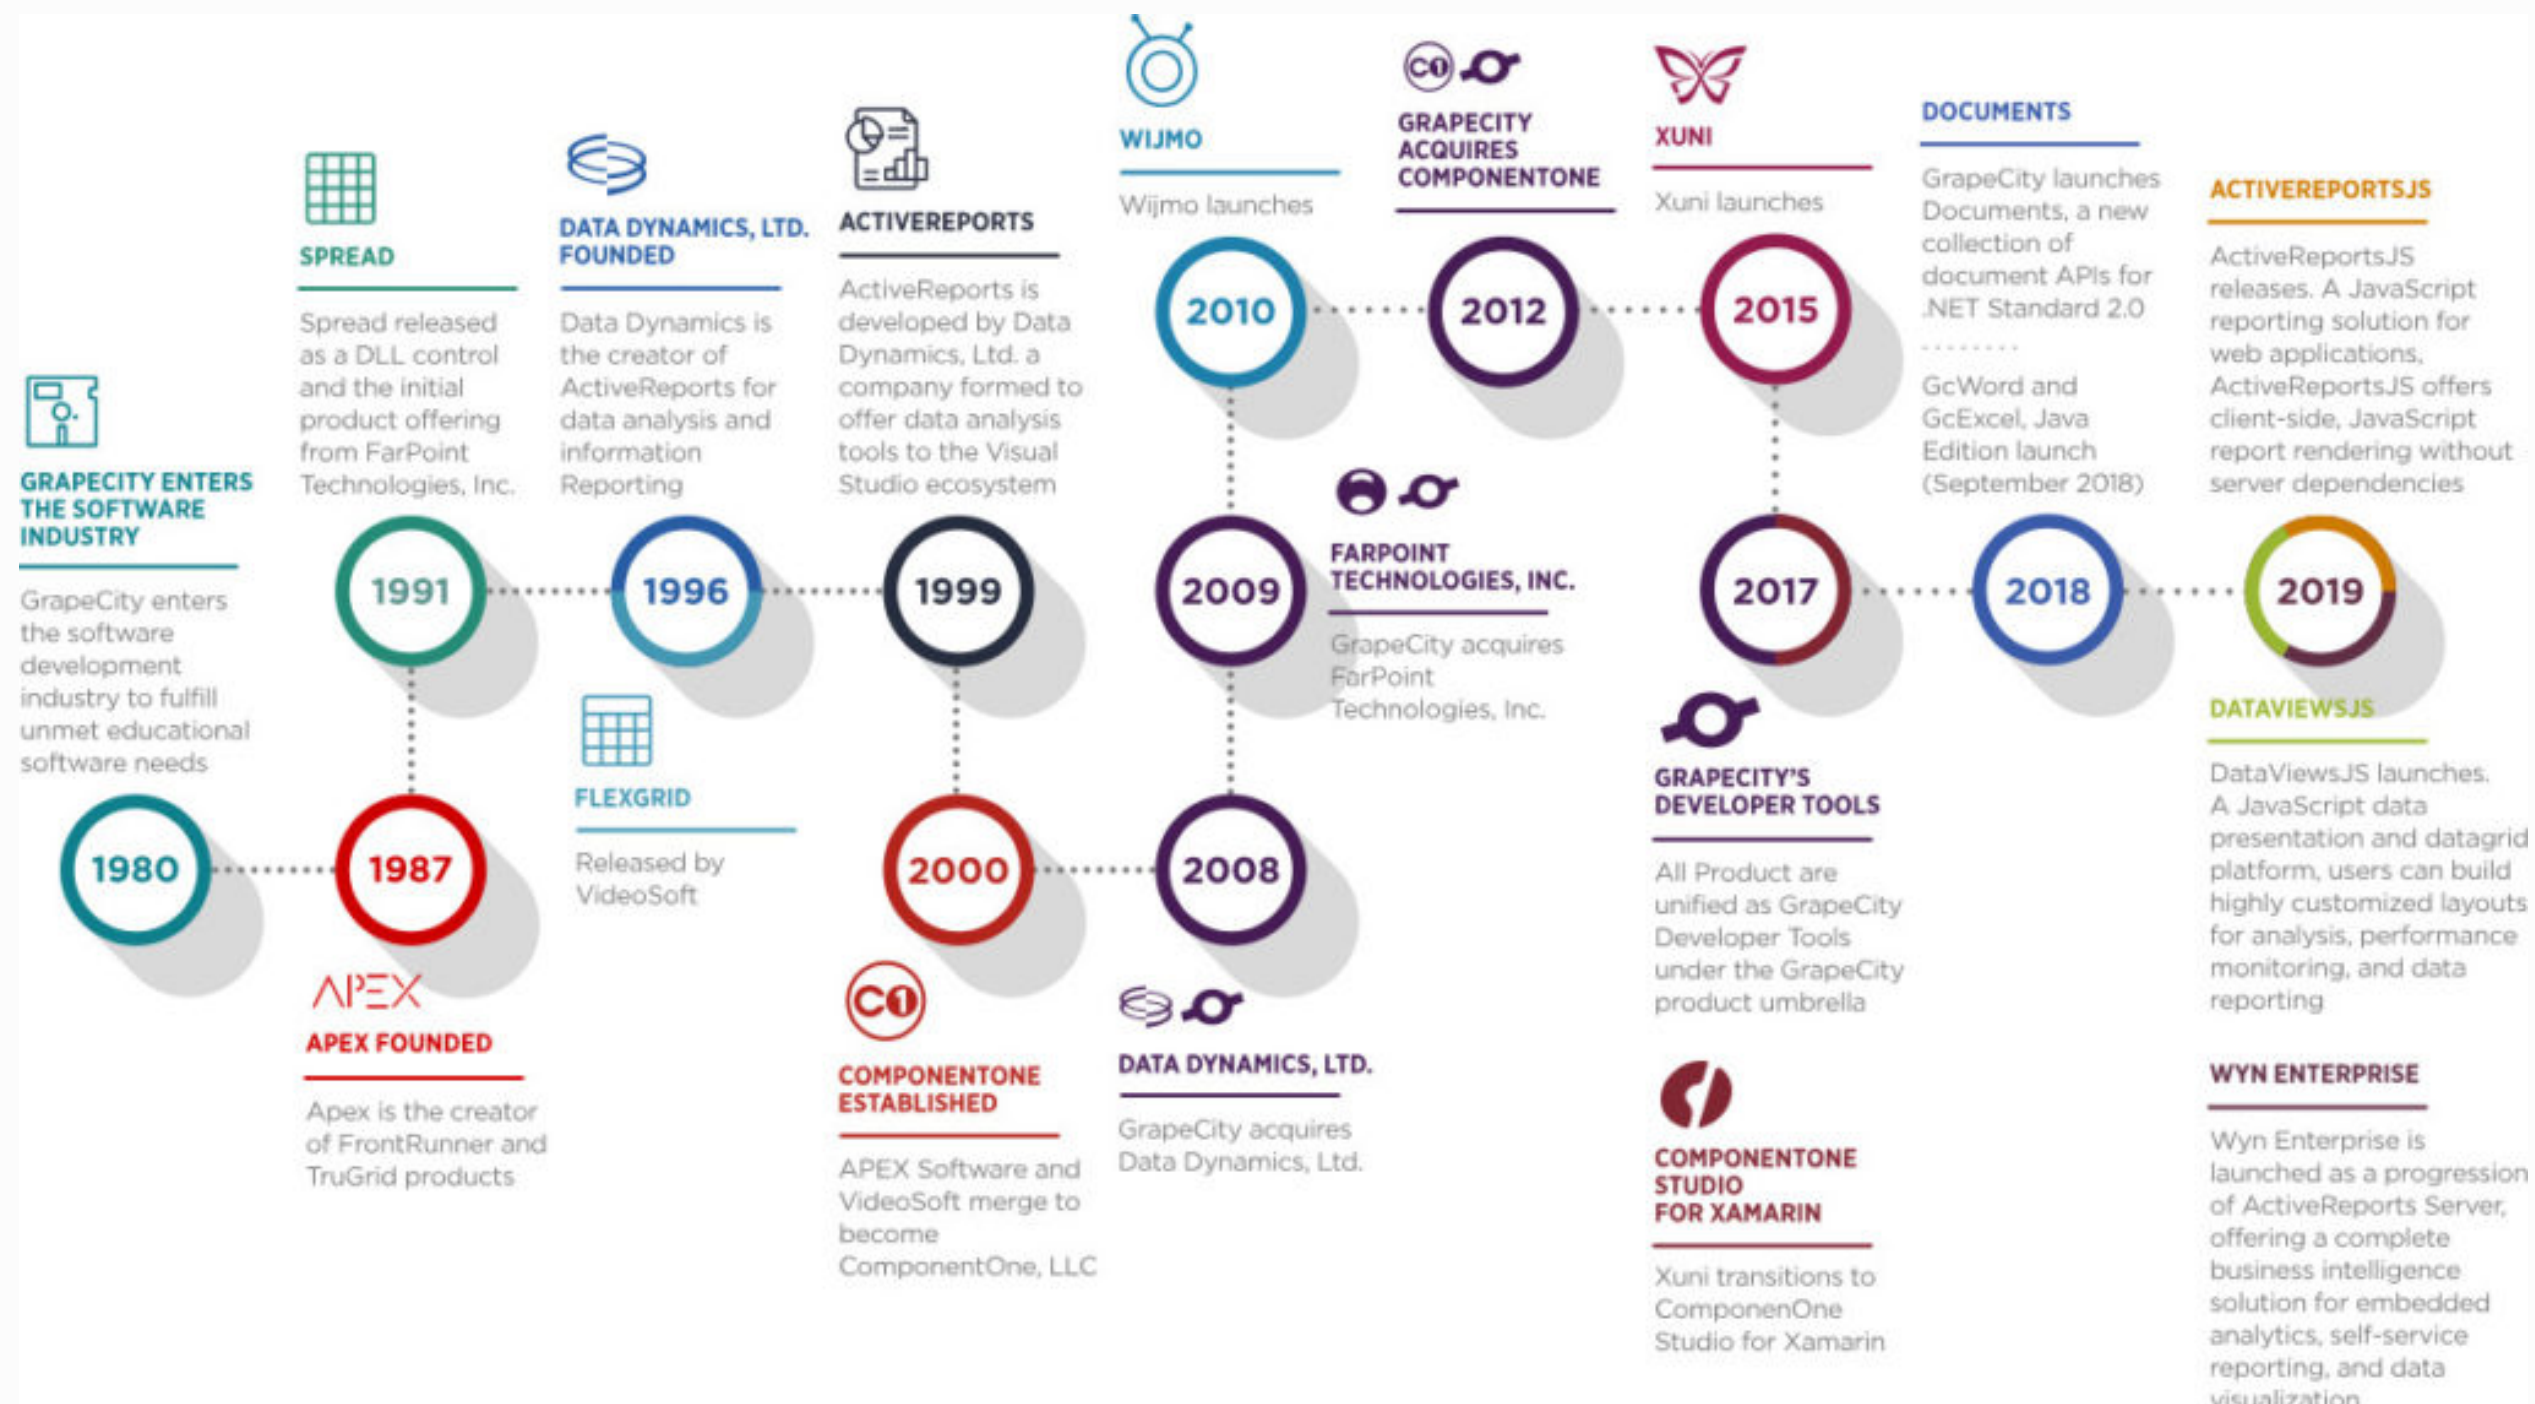

Timeline

GrapeCity was founded in **Sendai, Japan** in the early **1950's** by a group of American educators in Japan. This group established world-class elementary schools in northern Japan.

Afterwards GrapeCity expanded into technology and software in **1980's** by **Paul Broman**.

GrapeCity since has grown **organically** and by **acquisition**, to provide high-quality software solutions in a variety of markets, globally.

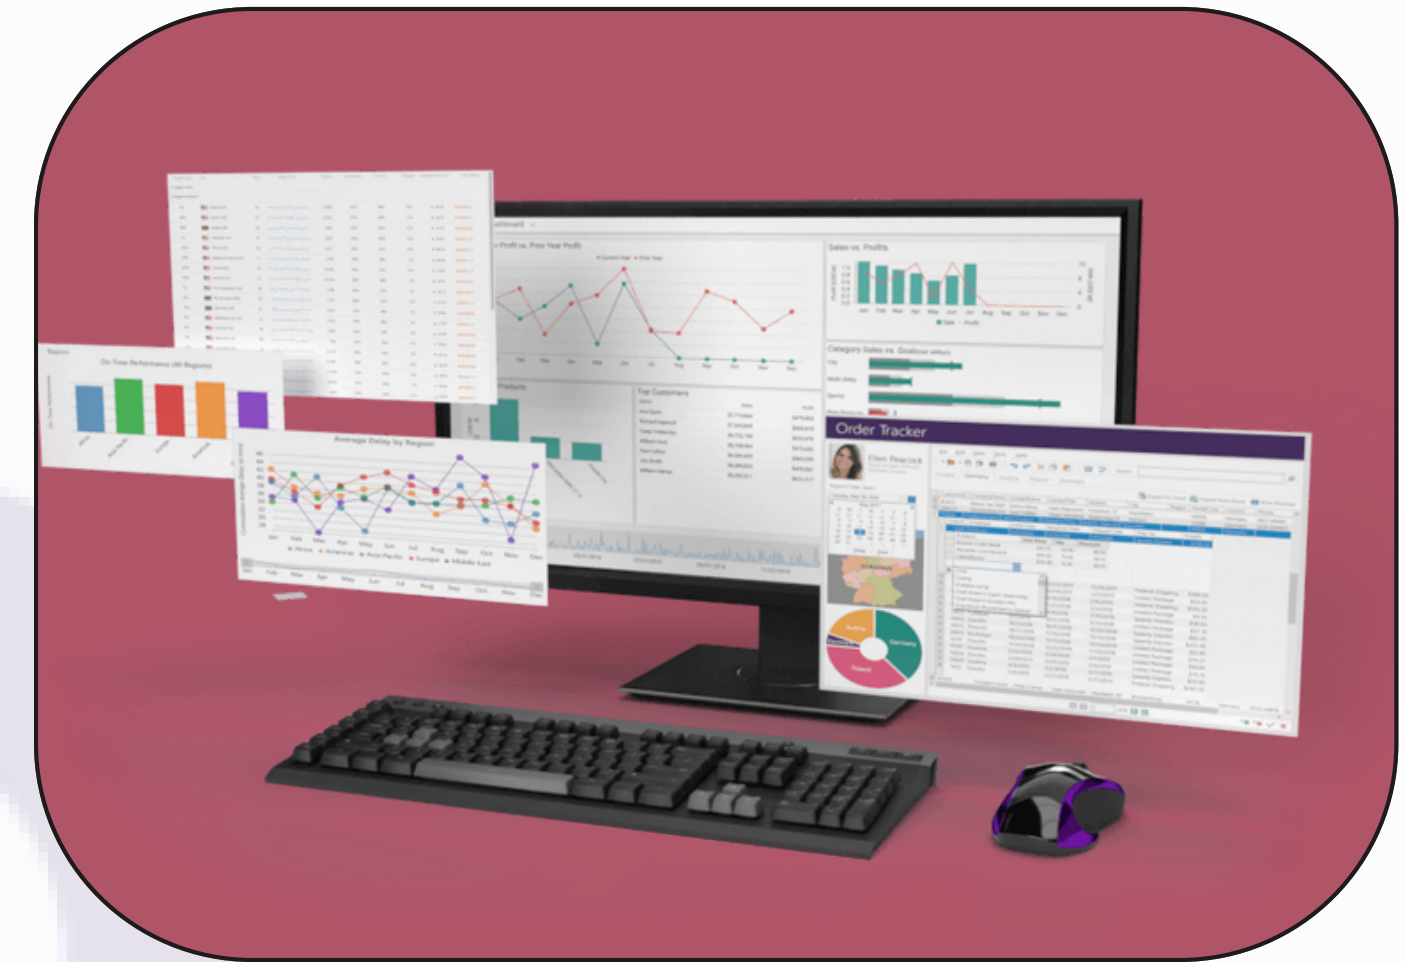

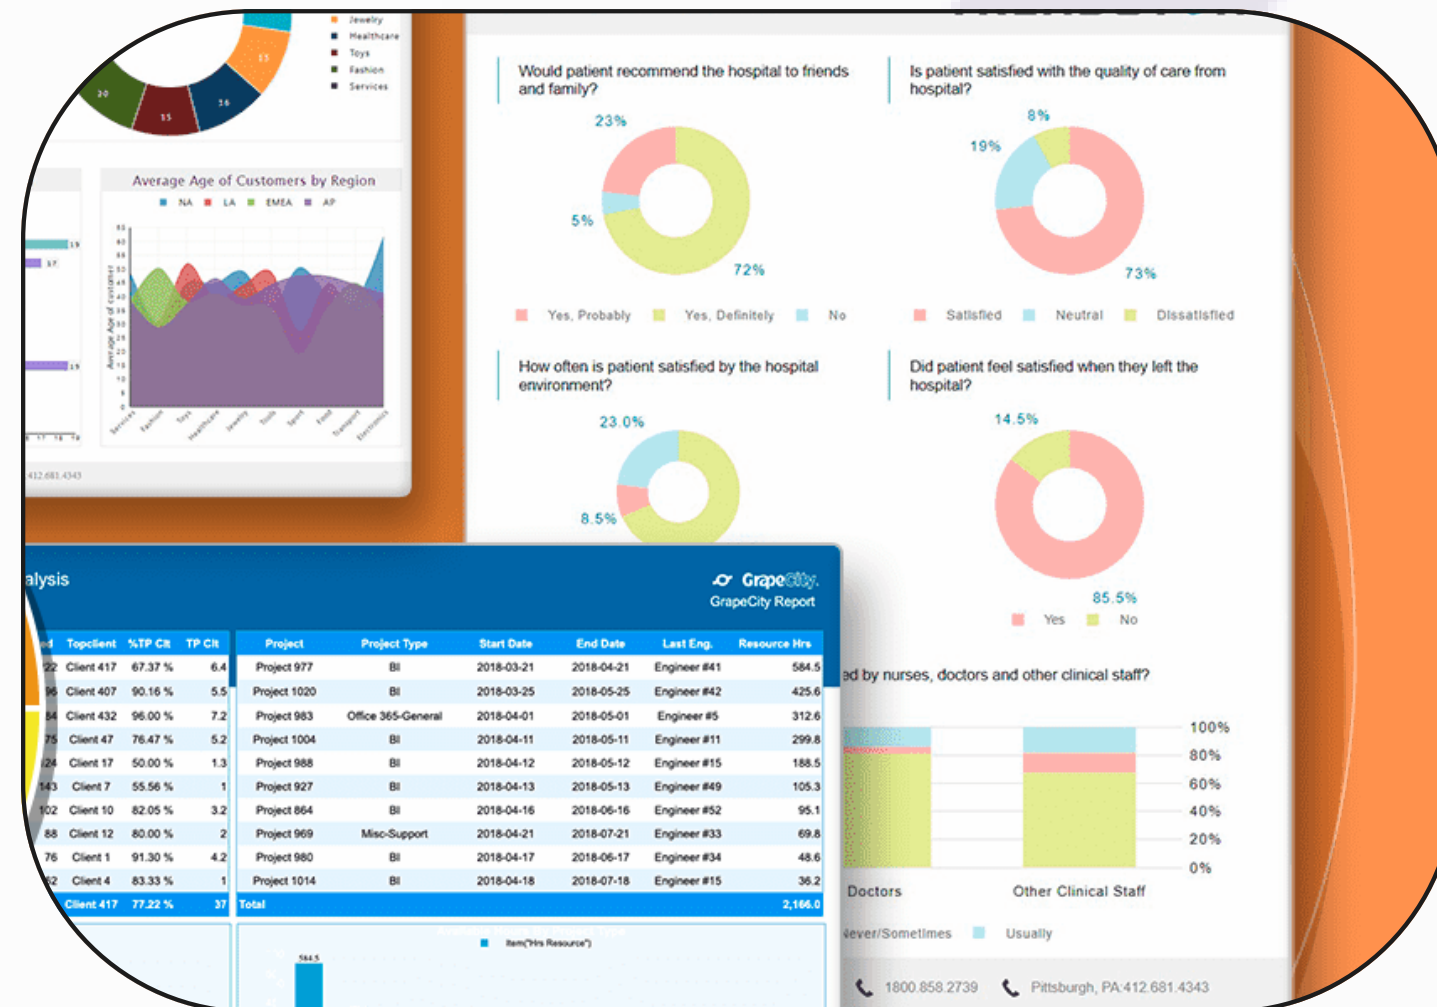

OUR PRODUCTS

ComponentOne

ComponentOne is a collection of UI controls for developing Windows Forms, WPF, UWP, ASP.NET, and WinRT applications. These controls provide a range of features including data binding, data visualization, and input validation. Some of the popular controls include FlexGrid, Chart, TreeView, and InputPanel.

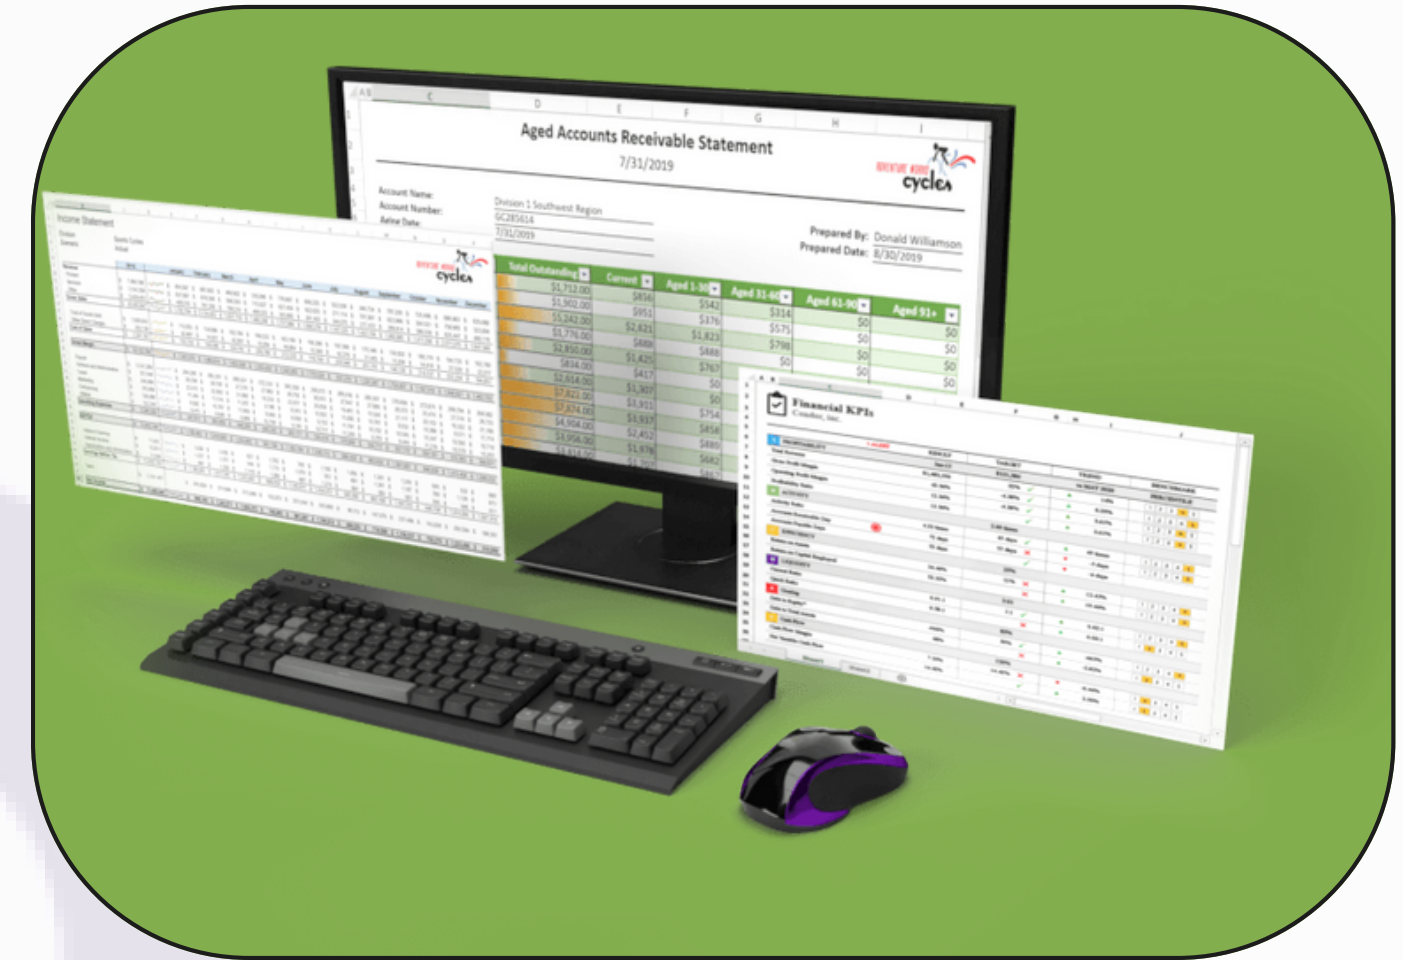

ActiveReports

ActiveReports is a reporting tool that allows developers to create and design reports in various formats including PDF, Excel, Word, and HTML. It also offers features such as data visualization, drill-down reports, and custom templates. It is available for .NET, Java, and ActiveX platforms.

Spread

Spread is a spreadsheet component for .NET and JavaScript platforms. It offers a range of features such as data binding, cell formatting, conditional formatting, and formula support. Spread can also be used to create interactive dashboards and data visualization tools.

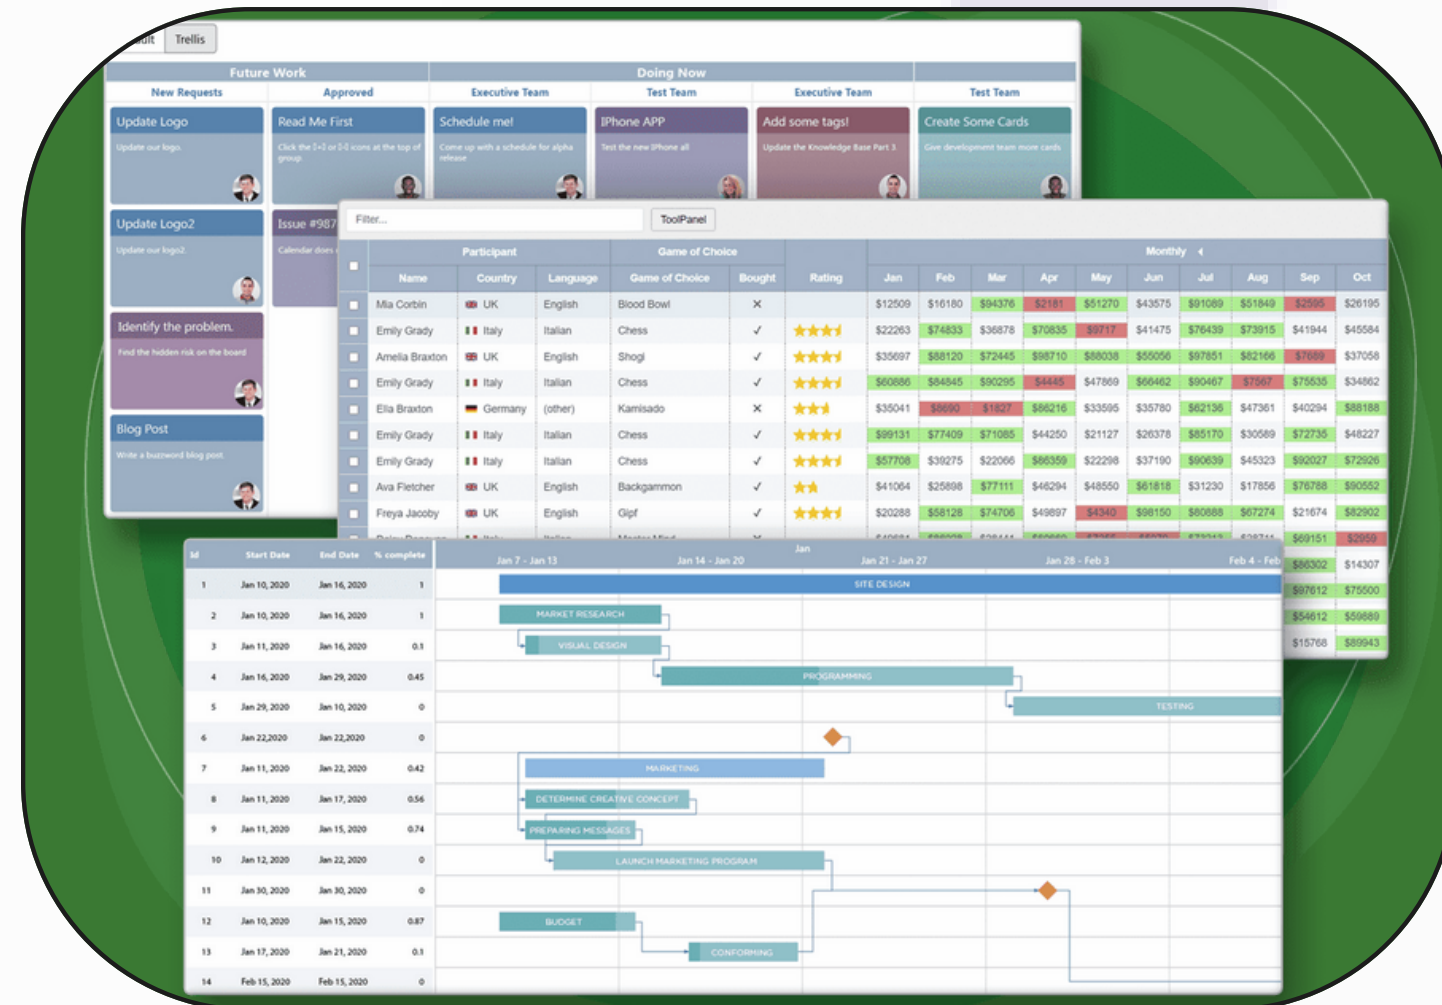

Wijmo

Wijmo is a collection of UI controls for building web applications using JavaScript frameworks such as Angular, React, and Vue. It offers a range of controls such as grids, charts, input controls, and gauges. Wijmo is also customizable and allows developers to create their own custom controls.

Documents

Documents is a .NET library for creating, manipulating, and converting documents in various formats including Word, PDF, and Excel. It offers features such as document merging, mail merge, and document protection. Documents can also be used to extract text, images, and metadata from documents.

DataViews

DataViews is a data visualization and analysis tool that allows users to create and manipulate data sets using a drag-and-drop interface. It offers a range of data visualization options, including charts, grids, and maps, which can be customized to meet specific user needs.

40+
Years of
